

---

Number: CSB-150204-1

Released: 4<sup>th</sup> February 2015

Subject: Limited Support for Remote SQL Database

Product: FortiAnalyzer

---

### Description:

Starting with FortiAnalyzer software versions 5.0.7 and 5.2.0, remote SQL database support will only cover the insertion of log data into the remote MySQL database. Historical log search and reporting capabilities, which rely on the remote SQL data, will no longer be supported.

### Affected Products:

All FortiAnalyzer units running 5.0.7 or later, or 5.2 and using the remote database option.

### Resolution:

Those wishing to use the full set of FortiAnalyzer features are encouraged to switch as soon as possible to storing SQL data locally on the FortiAnalyzer. The local database can be built based upon existing raw logs already stored on the FortiAnalyzer.
